ANNOUNCEMENT

The Department of Health-Eastern Visayas Center for Health Development clarifies the number of confirmed cases of COVID-19 in Eastern Visayas as of today, March 27, 2020, 9:00 AM, that we still only have **ONE (1) positive case**.

This calls our attention and the public that based on the COVID-19 tracker of DOH-Central office, it was reflected that Eastern Visayas have already four (4) confirmed cases of COVID-19, however if you click the map tagging it will indicate only 1 patient (PH 489).

As of today, we have not receive any additional results either positive nor negative from RITM. Concerned office in-charged with the tracker of Central Office have already been called since last night to correct the said wrong entry which allegedly was due to system glitch.

Please remain calm! DOH-EV CHD will be updating you with much needed information regarding COVID-19 situation.
